

Jean-Marc Greneche is CNRS research director at the Institut des Molécules et Matériaux du Mans (IMMM UMR CNRS 6283) at Le Mans University (France). He obtained a PhD in Physics in 1987, was a Humboldt fellow in Karlsruhe in 1988 (Germany), was Editor at Journal of Alloys and Compounds, director of the IMMM and research network manager at the CNRS National Institute of Physics.

His scientific activities are mainly related to magnetism, nanomagnetism and magnetic materials including crystalline, amorphous, nanoparticles and nanostructured solids, using ^{57}Fe Mössbauer spectrometry facilities. He collaborates with physicists, chemists, geologists and biologists and has established numerous international bilateral collaborations. He has led numerous national research projects and bilateral international projects.
